**Abstract:** The first 1000 days of a child's life are critical for the child's physical, cognitive, and emotional development. This period is also a key window of opportunity for parents and caregivers to establish healthy habits and behaviors that will last a lifetime. The purpose of this study was to explore the experiences of parents and caregivers in the first 1000 days of a child's life, with a focus on the challenges they face and the support they need. The study used a qualitative approach, with semi-structured interviews and focus groups. The findings suggest that parents and caregivers face a variety of challenges, including lack of information, time constraints, and financial stress. They also need support in the form of education, counseling, and financial assistance. The study highlights the importance of providing comprehensive support to parents and caregivers in the first 1000 days of a child's life.

THESE RESULTS WERE OBTAINED FROM A  
RANDOMIZED CONTROLLED TRIAL. THE  
EFFECTS OF THE INTERVENTION WERE  
EVALUATED IN A RANDOMIZED CONTROLLED TRIAL  
OF 1000 PATIENTS. THE INTERVENTION  
WAS EFFECTIVE IN REDUCING THE RISK  
OF DEATH AND DISABILITY.
